Forward-looking information

Certain information contained in this release, including statements concerning expected performance such as those relating to net sales, gross margins, earnings, cost savings, acquisitions, brand marketing support, transaction and integration expenses, special charges, income tax expense and the impact of foreign currency rates are “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934. These statements may be identified by the use of words such as “may,” “will,” “expect,” “should,” “anticipate,” “intend,” “believe” and “plan.” These statements may relate to: the expected results of operations of businesses acquired by the company, including the acquisition of RB Foods; the expected impact of costs and pricing actions on the company's results of operations and gross margins; the expected impact of productivity improvements, including those associated with our CCI program and global enablement initiative; the expected working capital improvements; expectations regarding growth potential in various geographies and markets, including the impact from customer, channel, category, and e-commerce expansion; expected trends in net sales and earnings performance and other financial measures; the expected impact of the U.S. Tax Act; the expectations of pension and postretirement plan contributions and anticipated charges associated with such plans; the holding period and market risks associated with financial instruments; the impact of foreign exchange fluctuations; the adequacy of internally generated funds and existing sources of liquidity, such as the availability of bank financing; the anticipated sufficiency of future cash flows to enable the payments of interest and repayment of short- and long-term debt as well as quarterly dividends and the ability to issue additional debt or equity securities; and expectations regarding purchasing shares of McCormick's common stock under the existing repurchase authorization.

These and other forward-looking statements are based on management's current views and assumptions and involve risks and uncertainties that could significantly affect expected results. Results may be materially affected by factors such as: damage to the company's reputation or brand name; loss of brand relevance; increased private label use; product quality, labeling, or safety concerns; negative publicity about our products; business interruptions due to natural disasters or unexpected events; actions by, and the financial condition of, competitors and customers; the company's inability to achieve expected and/or needed cost savings or margin improvements; negative employee relations; the lack of successful acquisition and integration of new businesses, including the acquisition of RB Foods; issues affecting the company's supply chain and raw materials, including fluctuations in the cost and availability of raw and packaging materials and freight; government regulation, and changes in legal and regulatory requirements and enforcement practices; global economic and financial conditions generally, including the availability of financing, and interest and inflation rates; the effects of increased level of debt service following the RB Foods acquisition as well as the effects that such increased debt service may have on the company's ability to react to certain economic and industry conditions and ability to borrow or the cost of any such additional borrowing; the interpretations and assumptions we have made, and guidance that may be issued, regarding the U.S. Tax Act enacted in December 2017; assumptions we have made regarding the investment return on retirement plan assets, and the costs associated with pension obligations; foreign currency fluctuations; the stability of credit and capital markets; risks associated with the company's information technology systems, including the threat of data breaches and cyber attacks; fundamental changes in tax laws; volatility in our effective tax rate; climate change; infringement of intellectual property rights, and those of customers; litigation, legal and administrative proceedings; and other risks described in the company's filings with the Securities and Exchange Commission.

Actual results could differ materially from those projected in the forward-looking statements. The company undertakes no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by law.

Non-GAAP Financial Measures

The following tables include financial measures of adjusted operating income, adjusted operating income margin, adjusted income taxes, adjusted net income and adjusted diluted earnings per share, each excluding the impact of special charges for each of the periods presented. These financial measures also exclude the impact of items associated with our acquisition of RB Foods on August 17, 2017 as these items significantly impact comparability between years. These financial measures also exclude, for 2018, and the comparison of our results for 2018 to 2017, the net estimated impact of the effects of the one-time transition tax and re-measurement of our U.S. deferred tax assets and liabilities as a result of the U.S. Tax Act passed in December 2017 as these items will significantly impact comparability between years. Adjusted operating income, adjusted operating income margin, adjusted income taxes, adjusted net income and adjusted diluted earnings per share represent non-GAAP financial measures which are prepared as a complement to our financial results prepared in accordance with United States generally accepted accounting principles.

In our consolidated income statement, we include separate line items captioned “Special charges” and “Transaction and integration expenses” in arriving at our consolidated operating income. Special charges consist of expenses associated with certain actions undertaken by the company to reduce fixed costs, simplify or improve processes, and improve our competitiveness and are of such significance in terms of both up-front costs and organizational/structural impact to require advance approval by our Management Committee, comprised of our Chairman, President and Chief Executive Officer; Executive Vice President and Chief Financial Officer; President Flavor Solutions Segment and McCormick International; President Global Consumer Segment and Americas; Senior Vice President, Human Relations; and Senior Vice President, Strategy and Global Enablement. Upon presentation of any such proposed action (including details with respect to estimated costs, which generally consist principally of employee severance and related benefits, together with ancillary costs associated with the action that may include a non-cash component or a component which relates to inventory adjustments that are included in cost of goods sold; impacted employees or operations; expected timing; and expected benefits) to the Management Committee and the Committee’s advance approval, expenses associated with the approved action are classified as special charges upon recognition and monitored on an ongoing basis through completion.

Transaction and integration expenses consist of expenses associated with the acquisition or integration of the RB Foods business. These costs primarily consist of amortization of the acquisition-date fair value adjustment of inventories that is included in cost of goods sold; outside advisory, service and consulting costs; employee-related costs; and other costs related to the acquisition, including the costs related to the bridge financing commitment that was included in other debt costs in 2017. We incurred these costs in 2017 and will incur additional integration costs in 2018.

Income taxes associated with the enactment of the U.S. Tax Act in December 2017 consists of a net income tax benefit of \$297.9 million recognized during the first quarter of 2018, which includes the estimated impact of the tax benefit from revaluation of net U.S. deferred tax liabilities based on the new lower corporate income tax rate and the tax expense associated with the one-time transition tax on previously unremitted earnings of non-U.S. subsidiaries.

We believe that these non-GAAP financial measures are important. The exclusion of special charges, the impact of the acquisition date-inventory fair value adjustment on cost of goods sold, transaction and integration expenses, other debt costs and the net income tax benefit associated with enactment of the U.S. Tax Act provide additional information that enables enhanced comparisons to prior periods and, accordingly, facilitates the development of future projections and earnings growth prospects. This information is also used by management to measure the profitability of our ongoing operations and analyze our business performance and trends.

These non-GAAP financial measures may be considered in addition to results prepared in accordance with GAAP, but should not be considered a substitute for, or superior to, GAAP results. In addition, these non-GAAP financial measures may not be comparable to similarly titled measures of other companies because other companies may not calculate them in the same manner that we do. We intend to continue to provide these non-GAAP financial measures as part of our future earnings discussions and, therefore, the inclusion of these non-GAAP financial measures will provide consistency in our financial reporting. A reconciliation of these non-GAAP financial measures to the related GAAP financial measures is provided below:

Non-GAAP Financial Measures

(in millions except per share data)	Three Months Ended	
	5/31/2018	5/31/2017
Operating income	\$ 191.7	\$ 132.6

Adjusted earnings per share - diluted	<u>\$ 1.02</u>	<u>\$ 0.82</u>
% increase versus year-ago period	24.4%	

(1) Adjusted operating income margin is calculated as adjusted operating income as a percentage of net sales for each period presented.

(2) The non-recurring income tax benefit, net, associated with enactment of the U.S. Tax Act of \$297.9 million is based upon estimates and judgments that we believe to be reasonable. That benefit is provisional and may change during the measurement period as a result of among other things, changes in interpretations and assumptions we have made, guidance that may be issued and other actions we may take as a result of the U.S. Tax Act different from that presently assumed.

Non-GAAP Financial Measures

Because we are a multi-national company, we are subject to variability of our reported U.S. dollar results due to changes in foreign currency exchange rates. Those changes have been volatile over the past several years. The exclusion of the effects of foreign currency exchange, or what we refer to as amounts expressed “on a constant currency basis”, is a non-GAAP measure. We believe that this non-GAAP measure provides additional information that enables enhanced comparison to prior periods excluding the translation effects of changes in rates of foreign currency exchange and provides additional insight into the underlying performance of our operations located outside of the U.S. It should be noted that our presentation herein of amounts and percentage changes on a constant currency basis does not exclude the impact of foreign currency transaction gains and losses (that is, the impact of transactions denominated in other than the local currency of any of our subsidiaries in their local currency reported results).

Percentage changes in sales and adjusted operating income expressed in “constant currency” are presented excluding the impact of foreign currency exchange. To present this information for historical periods, current period results for entities reporting in currencies other than the U.S. dollar are translated into U.S. dollars at the average exchange rates in effect during the corresponding period of the prior fiscal year, rather than at the actual average exchange rates in effect during the current fiscal year. As a result, the foreign currency impact is equal to the current year results in local currencies multiplied by the change in the average foreign currency exchange rate between the current fiscal period and the corresponding period of the prior fiscal year. Constant currency growth rates follow:

	Three Months Ended May 31, 2018		
	Percentage Change as Reported	Impact of Foreign Currency Exchange	Percentage Change on Constant Currency Basis

Non-GAAP Financial Measures

To present the percentage change in projected 2018 sales, adjusted operating income and adjusted earnings per share on a constant currency basis, projected sales and adjusted operating income for entities reporting in currencies other than the U.S. dollar are translated into U.S. dollars at the company's budgeted exchange rate for 2018 and are compared to the 2017 results, translated into U.S. dollars using the same 2018 budgeted exchange rate, rather than at the average actual exchange rates in effect during fiscal year 2017. This calculation is performed to arrive at adjusted net income divided by historical shares outstanding for fiscal year 2017 or projected shares outstanding for fiscal year 2018, as appropriate.

The following provides a reconciliation of our estimated earnings per share to adjusted earnings per share for 2018 and actual results for 2017:

(in millions except per share data)	Twelve Months Ended	
	2018 Projection	11/30/17
